

DIADEM

Senior Mobile & Applied AI Engineer

Email: mail2diadem@gmail.com **Phone:** +917002566413 **Location:** Guwahati, India

LinkedIn: linkedin.com/in/diadem-nath-a5396152/ **GitHub:** github.com/Xdiad47

PROFESSIONAL SUMMARY

Senior Mobile & Applied AI Engineer with 7 years of experience building production-grade applications across Android, iOS, Web, and Backend platforms. Experienced in designing end-to-end mobile and AI systems utilizing direct LLM API integrations, Retrieval-Augmented Generation (RAG), semantic search, and modern frontend/backend architectures. Strong expertise in Python, Kotlin, Swift, and scalable cloud-based environments. Passionate about "building in public" and transforming advanced technologies into practical, intelligent products that solve real-world problems.

TECHNICAL SKILLS

Applied AI: Gemini, Groq, Claude, LangChain, Prompt Engineering, Retrieval-Augmented Generation (RAG), AI Agents, Embeddings, Semantic Search, Vector Databases (FAISS, ChromaDB).

Programming Languages: Kotlin, Swift, Python, Java, Dart.

Mobile: Android, Kotlin, Jetpack Compose, iOS, Swift, SwiftUI, Java, Flutter.

Backend & Frontend: Next.js, HTML, CSS, Flask, FastAPI, Firebase, REST APIs.

Tools: Docker, Git, GitHub, Firebase, Postman, Vercel, Android Studio, Xcode, VS Code, Apple App Store Connect, Google Play Console.

PROFESSIONAL EXPERIENCE

Mobile App Developer | Itzeazy India

4-Month Contract

- Created and developed native mobile applications for both iOS and Android platforms.
- Managed the complete release and publishing workflows, successfully deploying the applications to both the Apple App Store and Google Play Store.

iOS Developer | Waynix

February 2026 – June 2026 (4-Month Contract)

- Developed a new iOS application from the ground up and successfully managed its release to the Apple App Store.
- Maintained the entire Apple Developer ecosystem, including account creation, TestFlight beta distribution, and App Store Optimization (ASO).

Senior Mobile & Applied AI Engineer | Kushmanda AI

May 2020 – September 2026

- Developed and maintained production Android and iOS applications utilizing Kotlin, Jetpack Compose, Swift, and SwiftUI.
- Built company projects from scratch, including consumer applications "My Lucky Days" and "Wiki Bedtime Stories".
- Led a team of four engineers, managing architecture, feature planning, code reviews, and mentoring.
- Migrated legacy Android applications from Java XML to Kotlin and Jetpack Compose.
- Published multiple Android and iOS applications, managing the complete release lifecycle.

Android Developer | Marak Technologies Pvt. Ltd.

2019 – 2020

- Built enterprise Android applications for business automation.
- Developed a QR-code attendance management system using Android Camera APIs.
- Integrated REST APIs and optimized enterprise software performance.

FEATURED PROJECTS

Personal Solo Projects

PocketPace: Daily Budget Plan (Android, Google Play Store)

A smart personal finance application featuring dynamic daily spending limit calculations and offline-first tracking. Engineered AI-powered components including natural language weekly spending reports and automated PDF bank statement analysis to categorize transactions and highlight cash flow trends.

Tech: Native Android, Kotlin, Jetpack Compose, Firebase, LLM APIs.

Scanly (Android)

A smart document scanner application allowing users to digitize documents and interactively chat with their PDFs. Designed the backend integration utilizing Retrieval-Augmented Generation (RAG) and document embeddings to deliver accurate, context-aware answers via the Groq AI API.

Tech: Kotlin, Jetpack Compose, Groq API, RAG, Embeddings.

Aura Plan (Android, Google Play Store)

An AI-powered wellness and productivity application combining personalized planning, mood analysis, journaling, BMI tracking, and meal recommendations. Features personalized AI-generated lifestyle suggestions powered by Prompt Engineering, Retrieval-Augmented Generation (RAG), and LangChain.

Tech: Kotlin, Jetpack Compose, Firebase, Gemini API, Groq API, Prompt Engineering, RAG, LangChain.

FlowMind

Built an AI-powered productivity workspace using AI Agents and RAG to help founders manage meetings, calendars, tasks, and organizational knowledge through an intelligent conversational interface.

Tech: Python, Flask, AI Agents, RAG.

Ayurveda AI

Developed a consumer-facing RAG application that delivers AI-powered Ayurvedic home remedies by retrieving answers from trusted PDF knowledge sources instead of generating generic responses.

Tech: Python, Flask, Docker, RAG.

AI Chief of Staff

An enterprise AI platform for founders and HR teams that converts company documents into an intelligent knowledge base. Features include AI-powered employee support, leave management, project tracking, reminders, and approval workflows.

Tech: Python, Flask, Docker, AI Agents, RAG.

Company Projects (Kushmanda Tech)

My Lucky Days (Android) & Wiki Bedtime Stories (iOS) — Built native applications from scratch, successfully managing full development and release cycles. *(Tech: Native Android, Native iOS, Swift)*

Hackathon Projects (Awarded 2nd Runner-Up by Humanity Founders)

Faith Connect — A Flutter social networking app created for worshippers to connect and interact as a community. *(Tech: Flutter, Firebase, Dart)*

AI Counsellor — A web app developed to help students find good colleges, check scholarship eligibility, and explore opportunities for foreign and top university scholarships. *(Tech: Next.js, Firebase, Groq AI API, LLM APIs)*

EDUCATION

Master of Computer Applications (MCA) — North Eastern Hill University | 2017 – 2020

Bachelor of Computer Applications (BCA) — North Eastern Hill University | 2013 – 2016
